Len Davis Wins "Battle of Music"

The "Battle of Music", in which the Len Davis Royal Arcadians of Lethbridge, and Joseph Melnyk of Cardston engaged on Friday drew one of the largest crowds ever seen in Champion, the big community hall being overcrowded for the occasion, especially when dancing was taken into consideration. The crowd was widely representative, apparently every section of the community within 100 miles providing its quota. Until midnight the orchestras played alternately, the vote at the conclusion favoring the Len Davis orchestra. After supper both orchestras played together the result being highly approved by everyone concerned. The Women's Institute, serving lunch in the basement, was overwhelmed by the crowd, and the big overflow kept every eating place in town busy for some two hours.

Playing different styles of music, both orchestras furnished music of a character that would appeal to dancers anywhere, and while the decision of the big crowd was strongly in favor of the Lethbridge players, the Cardston players, especially in some selections, made a decided hit with the dancers. Either orchestra would be considered among the best available, and playing together they were immense.

The originators of this meeting are to be congratulated upon the wonderful success which attended their efforts, the extent of the interest aroused and the wide territory from which the crowd gathered being a surprise to everyone, towns south of Lethbridge to the south and Nanton on the north, and Claresholm and Stavelly to the west, all sending strong representations to the event.

Annual Contests to Destroy Pests

The usual contest for the destruction of gophers, crabs and muskrats has been initiated by the department of agriculture. The competitions include one for schools, and one for anyone of school age attending separate, public or high schools. Attractive prizes are offered in all competitions. A copy of the regulations may be obtained by writing Benj. Lawton, game commissioner, Edmonton.

Mr. and Mrs. R. F. Nelson and son, were among the supporters of the Stavelly baseball team on Wednesday, and renewed many old acquaintances while in town.

DR. T. ELWOOD BALEY
"Full Speed Ahead" is the title of the interest-compelling lecture delivered by Dr. T. Elwood Baley. His message is of vital importance to every community. Champion, June 8, 9, 10, 11.

Chronicle Completes Twelfth Year

This issue completes the twelfth year of the Chronicle's existence in Champion. Ordinarily, a resume of continual growth of the town and expansion of farming operations in the country would be in order, but somehow that kind of thing doesn't just seem to fit at the moment. So we will put off comment until some rainy day reminds us of some cheerful things to say about Champion and the Champion district. Till then adieu.

Mrs. Sommers

Breaks Arm

Mrs. F. O. Sommers had the misfortune to slip and fall on steps in front of the door on Sunday morning, breaking a bone in her wrist. She was taken to Vulcan, the local doctor being away, and the tractor set. While she is doing as well as could be expected, the injury is very painful and it will be some time before she recovers the use of her arm.

Champion 11 Stavelly 10

Stavelly and Champion junior baseball teams met on the Champion diamond on Wednesday evening. The weather was cold and there was a small turnout of spectators. The result was a win for the home team by a score of 11 to 10. Richard and Alex Latiff pitched the game for the locals, R. McCullough did the receiving, while Melness and Ferguson were in the points for Stavelly. With reasonable weather this would have been a good game and future meetings between these teams will be looked forward to with interest.

There was a sufficiently heavy frost on Monday night to damage the leaves on trees and nip off all early garden plants and flowers. It is hoped the damage will not be permanent.

Two ladies' coats were taken from the hall last Friday evening and up to the present have not been returned. It would appear from this that their removal was intentional. Watch out! The bull will get you.

There was never a period in the history of Western Canada when people needed the information, inspiration and entertainment which the Chautauqua brings. The management of the Canadian Chautauques, together with the constructive suggestions of leading committees, have built up a series of programmes this year which is without equal in the history of the Canadian Chautauqua movement. Since all travelling shows have found it impossible to tour Western Canada, and since the people, due to present circumstances, have been unable to travel as in former years, it is of vital importance that representative people in the realms of drama, music and entertainment should be brought to the communities of Western Canada.

Lady Chase, of Jasper, district deputy O.O.R.P., paid her official visit to the lodge this week, before the guest of Mrs. R. S. Alexander while in town.

"Meet the Family"

NOTES AND COMMENT

The documents to be used in the forthcoming census are formidable, indeed. When the census is completed the mass of information that will have been collected will require the services of an immense staff to total and make available in concrete form the statistics that will have been gathered from the four corners of the Dominion. Perhaps it is all necessary and useful and will return value for the cost involved, but to the ordinary layman much of the material gathered would seem to be not only unnecessary but likely to be almost useless.

The U.F.A. demands a co-operative commonwealth to prevent the recurrence of such periods of depression as the present provides. The first step advised is consumers' co-operative associations. The fact that ninety per cent of these organizations have failed is overlooked. The farmers are urged to try, try again to eliminate middlemen, even if the middlemen have proven their necessity and attempts to replace them have been unsuccessful. An agitation against somebody or something is absolutely necessary to the life of many organizations and their leaders.

The wind storms over the week end would seem to urge the more rapid adoption of

preventive methods for soil drifting. The stripping system seems to provide the most satisfactory means yet advanced for this purpose, and is in evidence in parts of this district, giving very satisfactory results. Big fields of summerfallow suffer most from soil drifting and where the strip method is used the damage has been greatly minimized.

The wheat conference is in progress in London with the Canadian High Commissioner as chairman. Sufficient progress has not been made by the gathering to guess as to its success in solving the wheat problem, but it is safe to say there will still be a wheat problem after the conference is over.

The conversion loan offered by the Dominion government would indicate that there is no falling off in the desire to own Dominion securities on the part of investors, in fact money seems bound to drift to savings banks and government bonds at present to the exclusion of many places where it would be very desirable if not as safe.

Chautauque is billed for Champion on June 8, 9, 10 and 11, and the programme would indicate the sessions will be fully up to the state of previous seasons. While conditions are not promising, these programmes have always been popular in this vicinity and will undoubtedly draw good audiences despite the shortage of money. Where all the programs can be attended the admittance is decidedly low.

Pig Shelters

(Experimental Farms Note.)

All swine, and particularly white ones, require shelter from the sun during the summer. To meet this condition at the Dominion Experimental Station, Rosthern, twelve rows of Caragana seed were sown in 1917 with the grain drill in rows four feet apart across the end of the pig pastures. These were kept clean and in two years were thinned to one foot apart in the row. Further cultivation was unnecessary because the plants shaded the ground and prevented

weed growth. In 1921 pigs were allowed the run of the plantation and have been allowed to use it ever since. It is hardy, affords complete shade, and does not require any attention.

Caragana affords the quickest shade that can be grown.

Cattle, horses and sheep must be kept away from Caragana because they seem to find it palatable and soon destroy it. Old hogs will eat it too if the pasture is short.

Kilns, planted four feet apart each way, might be just as effective for shelter and be more resistant to stock.

W. A. Munro, Superintendent, Dominion Experimental Station, May 8, 1931. Rosthern, Sask.

A Bond For A Bond

The Conversion Loan of 1931 of the Dominion Government makes an appeal to Canadian thrift by providing an opportunity to holders of maturing bonds to convert the benefits they have enjoyed as holders of Canada's premier security. They may enjoy the war-time interest rate and other privileges of the bonds they are holding until expiration and at the same time may extend the period of their secure investment for a period of fifteen or twenty-five years on the basis of yields now prevailing—yields which are constantly, if slowly, growing smaller and are almost certain to continue to do so; at least this is the opinion of those who are closely in touch with financial conditions and who are in a position to forecast investment trends of the next few years.

This renewal operation does not involve the raising of any additional money and therefore has no effect whatever upon the Dominion's obligations. Those uncertainties which may have been felt during the period of the world war have long since passed and even the doubts about the return of national prosperity are being dissipated as various economic factors indicate not only that the bottom has been reached, but that a sound foundation is being laid for constructive developments, even though the recovery may be gradual.

There is no other logical conclusion from all circumstances than that the Government in its program to take care of the refunding of heavy obligations created during war times, at a time when conditions do not permit of repayment out of revenues, is safeguarding the national interest and at the same time providing the Canadian people with an opportunity to continue an investment which has proven its real worth during a period of unusual stress.

The investor who has held a Dominion of Canada bond can do no better than to continue to hold a Dominion of Canada bond.

To the Holders of WAR LOAN AND VICTORY BONDS

A Statement by the Minister of Finance

♦♦

IN THE dark days of the War, Canadians loaned to the Government of the Dominion many hundred millions of dollars to enable the operations of the Allies to be carried to a successful conclusion.

When Canadians loaned their money to the Government, they received bonds which were promises to repay them the sum loaned with interest at the rate of 5% or 5½% per annum. On the 1st of October next, \$53,000,000 of these bonds become due; on the 1st of November, 1932, the maturity will be \$73,000,000; on the 1st of November, 1933, \$446,000,000; and, in 1934, \$511,000,000 must be provided for.

It would not be prudent, either in the interest of the security holders or the country itself, to wait until these loans become due before providing for their payment or conversion. Action must be taken well in advance of the due dates to protect the credit of the country. The Government believes this an opportune time to afford Canadians the opportunity to exchange the bonds, which they own maturing in the next few years, for new bonds of the Dominion of Canada carrying interest at the rate of 4½% per annum, which is a very attractive return. Prior to the maturity date of the present bonds, those who accept this offer will, of course, continue to be paid interest at the rate as provided by the bonds they exchange.

Canadians who have always shown confidence in their country are earnestly invited to exchange the bonds they now own for bonds of the new issue. By so doing, they will render less difficult the task of providing for the future finances of the country, will enhance its credit and will greatly assist the Government in the present period of worldwide readjustments.

No money will be asked for and no new bonds will be sold at this time. It is proposed to limit the present conversion to \$250,000,000, but the Government has the right at its discretion to increase the amount if Canadians indicate a general desire to continue their investments in the securities of their Dominion. The subscription books will close on the 23rd of May.

I earnestly seek the active support of my fellow Canadians in making this conversion, which is one of the largest financial operations our country has undertaken in recent years, creditable alike to Canada and its citizens.

R. B. Bennett
Minister of Finance.

Drudgery is an Extravagance

FOR five hours today this woman patiently toiled over a washboard . . . bending, lifting, rubbing . . . doing the things a tireless little Electric Washer can do in two hours. Day after day, she dusts, sweeps, cleans . . . doing things a vacuum cleaner would do twice as fast with half the effort.

With Electricity ever at hand such drudgery is an extravagant waste of time and effort. Hours that now drag slowly by might be enjoyed in doing the things she'd rather do. The woman who wishes golden hours of freedom must first break the shackles of housework. Electricity is ready to help.

The Calgary Power Company represents in your territory the best security for any item of electrical equipment. He will tell you about the attractive terms upon which you can purchase many electrical appliances—with a small cash payment and the balance on your monthly light bills.

Calgary Power Company
Limited

EDMONTON

CALGARY

A total of 104,000 immigrants came to Canada last calendar year, was the reply given by Hon. W. A. Gordon, minister of immigration, to a question asked by Michael Luckovich (U.F.A., Vegreville) in the House of Commons. Of these 81,800 were from the United Kingdom and the Irish Free State and 25,802 were from the United States.

"Every man should make up his mind that if he expects to succeed, he must give an honest return for the other man's dollar. Grasp the idea and work it out to a successful conclusion. That's about all there is in life for any of us."

"How did you come to raid that that barber shop?" the dry agent was asked.

"Well," he replied: "It struck me as strange that such a lot of fellows should buy hair restorer from a bald-headed barber."

A friend is a person before whom I may think aloud.—Emerson.

New Uses For Wheat And Other Grains Is Subject Of Research Council Survey

New uses for surpluses of wheat and other grain are being made the subject of an exhaustive survey by the National Research Council. It was announced in a statement issued recently. Other studies are being conducted in the hope of developing processes which will turn waste materials into products of commercial value.

Dealing with the program of the National Research Council, the statement set forth:

"Two researches initiated are already yielding interesting results. One of these is a study of the refuse screenings (largely weed seeds), which accumulate at the elevators at the head of the lakes to the extent of more than 50,000 tons a year.

"Today these screenings, if marketable at all, fetch almost nothing. The research is already indicating that they could be made to yield products—oil for soap making, fertilizer, and possibly feed—which would make them distinctly valuable.

"In the other project a beginning has been made on the problem of finding methods of utilizing straw. This big problem is not likely to be solved in a hurry, but to surely one which a Canadian research institution should tackle. The traveller through Western Canada after harvest cannot fail to have been impressed by the almost mountainous piles of straw which dot the landscape, but few probably realize that the total amount of straw grown in Canada each year aggregates about 50,000,000 tons.

"The National Research Council is making a careful study of the possibilities of using surplus grain for the manufacture of fuel, alcohol, starch, dextrine, glucose and other sugars, acids and lacquer solvents by means of fermentation, etc. etc. This includes a study not only of the technical but also of the economic aspects. The latter are clearly important, as the fact that a given method of utilizing grains for manufacturing purposes is economical only in seasons when prices are abnormally low, obviously an important consideration in determining the feasibility of establishing plants based on such a method."

A Canadian Egg Plant

Experimental Work Being Carried Out To Get Type Fixed

An egg plant which promises much of value to Canadians is referred to in the annual report of the director of Dominion experimental farms. As the result of long continued studies, the Dominion horticulturist makes the following observations:

A Japanese egg plant called Negami, with fruit too small for the general market, having proved the only egg plant that would produce a satisfactory crop in many parts of Canada owing to its earliness, was crossed with the Black Beauty, one of the large but rather late varieties, with the result that an egg plant of good size was produced which ripened much earlier than the Black Beauty. Experimental work in this connection is now being centred upon getting the type fixed. When this is accomplished, an egg plant suitable for cultivation under Canadian conditions will be established and it will probably become an important new factor in horticulture throughout Canada.

Light Bulb With Little Heat

One of the problems long attacked by science, that of producing light without heat, has been brought nearer to solution by a Berlin scientist who has succeeded in making an incandescent lamp in which eighty per cent of the energy supplied by the electric current is converted into light. Many of the best lamps used today yield not more than six per cent in light, the remainder appearing as heat and other radiations.

Silk in Japanese warehouses at one time recently was valued at \$60,000,000.

"Look here, stand me a whisky and soda and you may win."—Dorffbarber, Berlin.

W. N. U. 1890

Better Demand For Wheat

European Market Much Stronger During Past Few Weeks

Europe is buying Canadian wheat again, indicated the monthly report on grain movement issued by E. A. Urzest, statistician to the Dominion Board of Grain Commissioners. Also, he forecasts, Europe will continue to buy Canadian wheat.

In April, exports of wheat from the Dominion totalled 16,600,843 bushels—more than 3,000,000 bushels in excess of exports for March. Of the April total, 15,000,843 bushels were cleared from seaboard ports. The rest was sold in the United States for milling in bond. Mr. Urzest mentions that chartering of tramp tonnage and available liner space is brisk at Montreal, an indication that wheat movement during May will be substantial. Vancouver and Prince Rupert, Pacific ports, were leading export points in April, a total of 5,872,855 bushels being shipped from the two. Shipments from Canada ports on the Atlantic amounted to 2,525,988 cleared from United States eastern ports. Imports of Canadian wheat for milling in bond totalled 1,565,000 bushels.

Wheat From Russia

British Purchases More Wheat From Russia Than From Canada

Canada came second best to Soviet Russia in supplying wheat to the United Kingdom in the first three months of 1931, it was announced by the Department of Trade and Commerce. In the corresponding period of 1930 and 1929 the Argentine Republic led with Canada a close second. This year the Argentine Republic has been relegated to fourth place. In a summary of trade figures in the United Kingdom in the first quarter of the year, Harrison Watson, Canadian Trade Commissioner in London, England, reports that of total imports of wheat amounted to 41,000,000 bushels, the Soviet Russia supplied 10,800,000; Canada, 10,400,000; Australia, 9,000,000; and the Argentine Republic, 7,587,000. Canada maintains her lead as the chief source of imports into the United Kingdom of wheat flour supplying 752,342 cwt. in the first quarter of 1931, as compared with 492,214 cwt. from the United States, her nearest competitor.

Where Plumb Line Is Crooked

In Northern India It Always Inclines Toward the South

India is a land of wonders. It has the tallest mountain in the world, the highest avalanches, the rainiest spot, and so many snakes that 70,000 people and 4,000 cattle are killed by them every year. But there is a still greater wonder. You know that if a boy holds up a plumb line in England—that is, a string with a weight on it—it hangs straight down; but in Northern India if a boy holds up a plumb line it does not hang straight. It leans towards the south. Why is this? One would think that if it leaned at all it would slant towards the mighty Himalayas mountains, attracted by their great mass. But, as a matter of fact, these mountains are made of light rocks, while the great Deccan Plain to the south consists of very dense and heavy soil. The plain therefore, attracts the plumb-line a little out of the straight.

Establish Packing Plant

Eastern Syndicate To Commence Operations In Saskatchewan

A Prince Edward Island syndicate has purchased a three-quarter section farm close to Long Lake, Strathburg, Sask., for the purpose of producing, raising and slaughtering hogs, and curing and shipping bacon to Reg. Land. It is stated that buildings capable of holding 5,000 hogs are being erected and the necessary equipment and equipment secured. Foundation stock of pure-bred Yorkshire hogs has been purchased and shipped to Long Lake.

High Finance

Twelve out of 17 police captains so far investigated in Chicago had excessive bank accounts. One of them on a salary of \$4,000 a year, bought \$18,000 worth of securities in four years. At least it is to be said of him that he did not waste his substance in riotous living.

Honore, Pliny, and other writers of ancient Rome, complained of the noise of the city, long before automobile horns, street cars, and radios, says a writer of the Classical Weekly.

QUEEN MARY ATTENDS WEDDING

Queen Mary leaving St. Margaret's, Westminster, with the bride's father, after recent wedding of her godchild, daughter of Sir Derek Keppel. Master of the Household, to Philip Broadhead, M.G. Her majesty mounted from Windsor especially for the occasion.

No Cause For Alarm

World Will End In Million Million Years, Says Astronomer

Accurate data on the precise moment when the Archangel Gabriel will send a blast from the trumpet of doom to destroy man and all his handiwork was obtained when Sir James Jeans, noted British astronomer, arrived at New York on the liner "Mauretania."

Sir James took two deep breaths and announced that, barring unforeseen accidents the end of the world would arrive in a million million years. Whereupon, New York went right ahead with their plans for the week-end.

Substitute For Flux

New Grain Is Being Tested Out In Western Canada

Safflower, which looks like a thistle without prickles, and has been cultivated in India and Egypt as an oil seed crop, is being tested in Western Canada, as a partial substitute for flax. The seeds contain a drying oil valuable in the production of paints and varnishes, and the oil cake is useful as stock feed. Safflower is suggested by experts in agriculture as a possible supplementary crop to flax in the Prairie Provinces.

Nothing pleases a loafer more than to annoy a busy man.

Farm To City Movement Is Becoming Less Popular And Reaction Is Setting In

Manitoba Hay For Scotland

Inquiry Is Made Regarding Shipments Via H.B. Route

A shipment of Western Canadian timothy hay to the Old Country market via the Hudson Bay Railway and Churchill, was a new possibility presented to the Board of Trade of The Pas, in a letter from the official Canadian Government Trade Commissioner in Glasgow, Scotland.

Asking for information as to the available supply of timothy in the western part of Canada and setting forth some of the market facts in Scotland, D. A. Ross, secretary of The Pas Board of Trade, received the letter from G. H. Johnson, in Glasgow, Scotland.

The letter in part follows: "Your name has been given to me by the Minister of Mines and National Resources, Manitoba, with reference to the following: A firm in Glasgow, Scotland, who import the largest quantities of Canadian hay in Scotland, and have for many years, desired to have information on the possibilities of hay shipments from the prairie provinces via Churchill. As this route will evidently be open for transportation in a few months time, there should be an opportunity for timothy hay for this market from Manitoba, if this quality is grown there."

The letter gives the details of the market and urges the local Board of Trade to investigate the possibilities of the market. The board will make a searching inquiry into the matter within the next few weeks.

Alberta Beef For Britain

May Ship From 400 to 500 Head Of Prime Beef Cattle Per Week

Larger supplies of one of Britain's principal items on the menu of the people of that country—beef—may be sent from Alberta, if satisfactory arrangements can be made between the British Consumers' Co-Operative and Alberta breeders. Representatives of this co-operative society, which caters to upwards of twenty million consumers in the British Isles, after an extensive tour of Alberta ranches, stock farms and feed lots, have, it is reported, stated their intention of taking from 400 to 500 head of prime beef cattle per week, provided a standard of quality can be guaranteed. They have been in consultation with members of the Alberta Government and representatives of the Alberta stockmen's associations and co-operatives.

Particular interest was evinced by the British buyers in the "feed lots" in the vicinity of Raymond, Alberta, where high quality beef are being fed on best by-products from the beef sugar refinery there in combination with alfalfa and other foods.

The representatives of the British Consumers' Co-Operative, which has its headquarters at Manchester, England, are George Hiddle, W. Eastwood and George W. Brooks, accompanied by A. C. Wieland, representative in Montreal of the co-operative.

Wheat Has Limited Vitality

Will Live For Good Many Years But Not Thousands

Wheat from Tutankhamen's tomb or from that of any other mummy's home in Egypt will not sprout on any farm in the world, and if anyone thinks otherwise, Sir Wallis Budge, the world's most eminent Egyptianologist, is ready to undeceive him. Sir Wallis, for the past quarter of a century, has been told the story so often that he had a little form printed in which he explained just why nothing of the kind could happen.

He writes to the "Times" telling the reason once more. What is dug up in Egyptian mummy tombs by an excited guide in front of a tourist is what all right, he says, but it is wheat that has been hidden there by modern Egyptians who regard the tombs as excellent storage places.

When the ancient wheat recovered from tombs that have been opened for the first time, has been made the subject of experiments at Kew Gardens, London, England, by experts under scientific conditions, and, in no instance, has such wheat ever sprouted. Finally not one of the savants at Tutankhamen's tomb discovered any wheat in it. Wheat it seems has for a good many years, but not for thousands.

There are several forms of capital punishment. Income tax is one.

Ireland is shipping frozen meat to other countries.

It is so unusual to hear a good word of farming nowadays that it is not surprising the statement of an individual, who says he has tried both town and country life, and that he has found that a family is better off on the farm with an income of \$300 than it is in the city with an income of \$5,000, should have been given considerable publicity.

It does seem far-fetched, to put it mildly. A family can live very comfortably on five thousand a year in the city, but surely, with the greatest economy, it would be hard to do more than exist on \$300, even in the country. But here we have the word of a man who speaks from experience, and he explains how the seemingly impossible is accomplished. In the first place, the question is not to be considered entirely on a monetary basis; there is more to life than merely living in elegant surroundings, with expensive food, and the latest equipment of various kinds, and the crowd of engagements and social matters which the city family comes to regard as an indispensable part of its normal existence.

On the farm, the family gets its own food, the products essential for the maintenance of healthy life; it gets plenty of outdoor exercise, and it is less worried than in the city. Perhaps, on the small income mentioned, it gets little more. Whether the family would be happier under such conditions is a matter of individual temperament. Some would, and others wouldn't. But, undoubtedly, city life is not all it is cracked up to be, even for those who are constructively well off.

It is said that a reaction is plainly discernible, and that the farm-to-city movement is less popular than it used to be. The land is the basis of all prosperity, and it is a very good sign if a growing appreciation of farm life is in evidence. It may be regarded as a retreat from over-sophistication.

Canada's Fresh Water Fisheries

Are Source Of Large Yearly Revenue To Dominion

The Canadian Information Bureau states that "more than half the fresh water of the globe is contained in inland waters of Canada." As anybody knows who has used the red in the Dominion and Newfoundland these waters are full of fish, but not everybody knows what a large revenue the fisheries bring in. It is greatest in Quebec, Ontario, and the Prairie Provinces. In 1929, Ontario led with \$3,920,000, and other totals were: Manitoba, \$2,745,000; Alberta, \$733,000; Saskatchewan, \$573,000; Quebec, \$450,000. When the large revenue of the fishery is added to the large revenue of the fishery, it is a very good sign if a growing appreciation of farm life is in evidence. It may be regarded as a retreat from over-sophistication.

One of the most delicious fish is the whitefish, which is abundant in the whole country bring in about \$1,000,000. Ontario enjoys the largest share, with Manitoba, Saskatchewan and Alberta following in that order.

New Landing Field Invented

A garage and landing field for aircraft on top of tall office buildings has been invented. Incoming pilots would direct their planes into a wind tunnel only twice as wide and twice as high as the machine itself. On either side of the tunnel fans set in motion by a signman would force air out at the exact speed of the landing plane. When the plane comes to a stop, the propellers and the fans would be cut off at the same instant.

Pocket Radio Sets

Pocket radio sets weighing less than two pounds and having an effective range of 100 miles are to be carried by London policemen on their rounds to keep in touch with headquarters.

Canada and World Disarmament

During this present period of world-wide business depression some people, good people too, are heard to thoughtlessly remark that the only way out will be another great war; that such a struggle will be the ultimate outcome of the world's existing difficulties. Such a statement should be the last to pass the lips of any person. Another war, instead of being a cure, would be the final world catastrophe.

Many contributing causes there may be to the economic trails of today, but the main source of all the trouble is to be found in the Great War, 1914-1918. That Titanic struggle laid the foundations for what has since taken place. In fact, all students of history fully realize that our present experiences are but a repetition of those which followed the Napoleonic wars. Another great war would have exactly the same results, only worse, because modern world conditions only serve to intensify and prolong such disturbances when they do occur.

Instead, therefore, of even thinking "war," the peoples of all nations should think and talk of nothing but permanent peace, and direct all their energies to the consummation of that ideal.

What is the great financial burden resting on the shoulders of the Canadian people today? It is the debt created by the Great War. The public debt of Canada created on the 1st of April, 1919, amounted to \$1,000,000,000, or 27% of the time of Confederation down to 1914 calls for annual interest payments of only \$12,883,000, or only 3% of our national expenditures, and approximately \$1.30 per head of our population. On the other hand, interest charges on the public debt created since 1914 amount to \$108,857,000, or 27% of our annual expenditures, and more than \$10.00 per head of population in each year.

But this is not all of the war burden. In addition to this 27% for interest on the war debt, Canadians are required to devote another 12.40% of all expenditures for services arising out of the war, such as pensions, after care of soldiers, etc. That is, out of every \$100 expended by the Government of Canada each year, \$39.42 is paid to the war. The war burden which lies the hands and cripples the efforts of our national government.

Of every \$100 expended by the United States \$60.00 is spent because of war, past, present and future. The war expenditures of Great Britain are in the proportion, or possibly even heavier.

In a recent speech before the International Chamber of Commerce meeting in Washington, President Hoover declared that the present world depression is largely due to "the destruction of life and property, the great tax burdens, and the social and political instability which resulted from the Great War," and he declared that one major accomplishment which international co-operation could effect in reducing tax burdens, removing a primary cause of unrest, and establishing greater confidence for the long future, was "the limitation and reduction of armaments." President Hoover proceeded to back up his assertion with these startling facts and figures:

"The world expenditure on all arms is now nearly five billions of dollars yearly, an increase of about 70% over that previous to the Great War. We stand today with nearly 5,000,000 men actively under arms and 20,000,000 more in reserve. These vast forces, greatly exceeding those of the pre-war period, still are to be demobilized, even though twelve years have passed since the Armistice was signed, because of fear and of inability of nations to co-operate in mutual reductions. Yet we are all signatories to the Kellogg-Briand pact by which we have pledged ourselves to the maintenance of national policy, and agreed to settle all controversies by pacific means."

Nevertheless, in the face of such a declaration from President Hoover, and also in the face of a huge national deficit of over \$500,000,000 which is forcing economies in practically every department of government, the United States budget for 1932 provides for an increase of \$26,000,000 in prospective outlays on military naval expenditures.

Canada, too, is a signatory to the Kellogg-Briand Peace Pact, and as such this Dominion is steadily reducing its expenditures for defence purposes; we have no offensive services. Expenditures for National Defence by Canada are the smallest of any of the world having about the same size population or degree of wealth. They total only 5.06% of our annual expenditures; in other words, about two dollars per head of our population.

While, therefore, this Dominion is not at all blameworthy for the present state of world armament, the Canadian people should be staunch supporters of further disarmament everywhere as a step towards permanent peace. As a people we cannot remain indifferent to the attitudes of other nations, and unless a general reduction in armaments takes place another world tragedy will be enacted, and into it we may again be drawn as active participants, and in any event cannot escape its disastrous effects.

Canada On Air Highways

"Canada is on the air highways which will connect the three great centres of population—Europe, Asia and North America—and which will enable Canadians to see that the Canadian sections of these great air routes are developed and operated by Canadian planes," said General J. H. MacBrien, president of the Aviation League of Canada, in an address at Windsor, Ontario.

Fragments of cotton cloth 5,000 years old, found in the ruins of towns in India, were examined microscopically, and the fibres were found similar to a kind of cotton still grown in India.

Establish Air Buses

Two parties of scientists and mechanics have been sent to the Arctic to establish the two base stations for the farthest north for the proposed Zepelin polar airline, planned to run from Berlin and London over the top of the world, down to Alaska and south to San Francisco.

Agricultural Impressed Industry

According to the Dominion Bureau of Statistics, 39 of the 62 farms in Canada engaged in the agricultural business in 1929 were located in Ontario; 12 in Quebec; 10 in Manitoba; 4 in Alberta, and one each in Prince Edward Island and Saskatchewan.

Smothering and Fainting Spells

Everything Would Turn Black

Mr. Andrew Black, Harcourt, N.B., writes: "I had been troubled with smothering and fainting spells and everything in front of me turned black, and I would fall down in faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people. I decided I would give them a trial. I used four boxes and found they helped me wonderfully. I feel as good as direct on route of price by 25c."

Unearth Ancient Treasures

Valuable Discoveries Made in Kish By Oxford-Field Museum Expedition
 Jewelry worn at the Court of Nebuchadnezzar, magnificent ornaments of the Sasanian period and royal tombs over 5,000 years old have been discovered by the Oxford-Field Museum Expedition excavating at Kish, near the site of old Babylon. Dr. Stephen Langdon, Professor of Assyriology, Oxford University, director of the expedition, has sent a report to Sir Charles Marston, secretary of the Oxford-Field Museum, who states that the jewelry is said to be several thousands of pounds. The expedition is working on three separate strata covering three periods of history. Sasanian sculpture, dating from about 250 A.D., was found on the top layer above the great Temple of Nebuchadnezzar. The find of treasure from the Nebuchadnezzar period is sensational and includes solid gold ornaments.

"It will be of great interest to know just what has been found because the time of Nebuchadnezzar is one about which we are learning a great deal from recent discoveries. It is just the time of the great Biblical narrative to an extraordinary extent," Sir Charles says.

Below the Nebuchadnezzar Temple have been found a further series of Sumerian royal tombs. These are about 5,500 years old and the expedition is just about to begin the work. Written tablets and cuneiform writings have been recovered which will probably shed light on the events of those times. Sir Charles adds: "It is especially interesting to know that the ruins of the Flood have been located at 3,400 B.C., so that these tablets are probably older still."

DRAPERIES MADE NEW

"When we found myself keeping a good house I resumed my draperies had been ruined from the use of the old ones. The result was they became badly faded and sun-spotted. I then used the new Draperies and they have been happy through them and I have not had to dye—never take the life out of them and I have not had to dye."

Mr. J. F. T. Montreal
 Industrial Manifold
 Industry Gradually Taking Priority Over Agriculture in the Province

Bearing upon the recent statement of the Hon. J. D. Davidson, of the Industrial Development Board of Manitoba, that industry is gradually taking priority over agriculture in the province, it is pointed out that Manitoba is rich in natural resources, having more than 500,000,000 in ore reserves, and a large area of land, in fact, 20,000 square miles of water surface. The province is also extremely rich in metallic and non-metallic minerals.

The annual production of iron ore is valued at \$100,000,000, moreover, Manitoba's 130 industrial plants have a yearly payroll of \$35,000,000.

Persin Balm—the unrivaled toilet preparation—essential to every dainty woman. Imparts rare charm and beauty to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Cools and refreshes. Relieves roughness. Ideal for the feminine complexion. Delicately fragrant. Swiftly absorbed into the tissues, leaving no stickiness. Persin Balm invariably creates a subtle elegance and charm.

Co-Operative Wool Growers

Wool Receiving Warehouses To Be Opened At Portage la Prairie and Regina

The Canadian Co-Operative Wool Growers have completed arrangements for receiving warehouses at Regina, Sask., and Portage la Prairie, Man., to receive shipments of wool from June 1 to August 31.

A letter has been sent to the wool producers requesting that they forward their shipments to arrive at the warehouses within these dates. Reports show that the volume of wool handled in the past year was 1,038,205 pounds more than the objective for the year, which was 4,000,000 pounds.

Apples On Century-Old Tree

This will be apples this year on the 106-year-old Hudson's Bay apple tree, on the lower part of the bar at Vancouver, Wash. The tree grew from a seed planted by a member of the Hudson's Bay Company in 1870, and seldom has missed a year in bearing. A. Quarnberg, horticulturist, said they very likely will bear a large crop this season.

More than 21,000,000 acres in Argentina were planted to wheat last season.

Week End Cruises

Cunard Lines Will Inaugurate Week-End Cruises From New York To Nova Scotia

In an effort to further increase the popularity of Nova Scotia as a tourist country among Americans, the Cunard Lines announces that their new famous "Week-End Cruises" scheduled for the months of July, August and September, will include a call at a Nova Scotian port.

The statement that was issued by Arthur Handley, general passenger traffic manager of the Cunard Lines, also pointed out the fact that not only will the "Week-End Cruises" call there, but those of the special summer cruises under the auspices of the National Tour, will also make a stop at a Nova Scotian port. The operation of the Nova Scotia authorities has been secured and every effort will be made to see that passengers on these cruises are given as much time ashore as possible to view the many attractions which the maritime provinces have to offer.

"This will be the first time," said Mr. Handley, "that three giant liners, the 'Queen Mary', the 'Berengaria', the 'Aquitania', and the 'Mauretania', have called at Halifax."

The "Aquitania" will be the "Mauretania" occasionally visited the Atlantic port during the war. The sailing of the "Queen Mary" will be to call at the Nova Scotia port will be "Aquitania," July 3rd, from New York. These cruises will be carried on throughout the summer months, commencing on July 27th with the "Transylvania" and finish with the sailing from New York on August 31st of the "Canada."

Until July there are scheduled four "Week-End Cruises" from New York, which will be carried on the "Queen Mary," the "Berengaria," the "Aquitania," and the "Mauretania." The second cruise will be that of the "Mauretania," leaving New York on May 15th, calling at Nassau in the Bahamas Islands. The third cruise is that of the "Berengaria," leaving New York on May 29th and calling at Bermuda, to be followed by a cruise of the "Mauretania" on June 5th to Nassau. The "Week-End Cruises" to Nova Scotia will then follow. The cruise of the "Berengaria" is standard remedy for the prompt treatment of scales and itching. Its healing power is so soothing the pain and aids a speedy recovery from the injury. It is an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. It is a safe and sure and stable remedy, many a doctor's and veterinary's fee.

The iron ore fields of Lapid, which is entirely north of the Arctic Circle, are among the most valuable in the world. The average from 58 to 70 per cent of iron.

National Enrolment

May Be Compulsory

Bill Introduced in Senate Aids Registration of People in Canada

Compulsory registration of all persons in Canada over the age of 16 years would be provided for by a bill introduced in the Senate by Senator J. B. Cragin. Registration would be followed by the issue of a certificate with the person's photograph and signature on it.

Certain exceptions to the universal registration would be allowed. Clottered nurses, members of the Royal Canadian Mounted Police or any provincial or municipal police force, inmates of asylums for the insane or mentally defective, inmates of penitentiaries and prisoners or of such other institutions as might be excepted by the minister in charge of the administration of the act would not have to register.

The act would apply to everyone in Canada, including British subjects and aliens. All would have to register within a named time and all persons subsequently reaching that age would have to register within one week of their 16th birthday.

In applying for registration a person would be required to state his name, date of birth, sex, whether he became so by birth or naturalization. He would also submit a photograph which would be attached to his certificate.

New Use For Music

Elgar's Rousing March Chorus Brooklyn Store At Closing Time

You may not have realized it, but one of the matters to which department-store executives have devoted a great deal of thought is how to get rid of their customers at closing time without actually pushing or shoving them out. A gentleman who wandered late one afternoon into Abrahamson's, 100 Broadway, New York, reports a neat way they have found to do this. He saw it work. At five-thirty a gong rang; instantly from loudspeakers scattered along the walls issued the rousing strains of Elgar's "Pomp and Circumstance." Ladies lingering over their purchases straightened, seized their parcels, and in no time were swinging briskly along toward the exits.

CHAPTER XVII.—Continued

"I rather think we are! But you are, a family usually has a daddy, and a mother, and more little children. Sonny, and Nick, and their father and mother are a family, so you see, you couldn't have me and Hastings for your mother. Do you understand?"

"Not—bawdy. Who—who can I have? Could it be Julie?"

Halliday stifled an impulsive smile, and answered: "I'm afraid not, but I seem to hesitate, then said: 'Martha, do you remember a lady who used to live here—as a very pretty lady, in a blue gown?'"

The child looked up, her eyes suddenly wide with distrust.

"She hurted my kitty. She hurted him so hard he run away."

Halliday drew a deep breath, and he had hoped the child had forgotten.

"She will never hurt my kitty again, dear. Would—would she put stily for a mother—little girl, right?"

"No," said Martha. She slid out Halliday's knee as she made the proposition but put something into her hand. "No," she said again, looking up soberly, "she isn't a mother. She won't do."

Tears started behind Halliday's lids. It was all so pitifully true. Then, meeting his eyes, he realized the innocent heart surmised that he was hurt, and she flung herself upon him, clapping his neck in a passion of overwhelming love.

"It doesn't matter—much," she comforted. "It doesn't matter hardly any. I've got you, Daddy."

"Yes," said Halliday huskily, and smiled. "There's not the least doubt in the world that she's got me!"

Next day he went to Boston to see his lawyer.

CHAPTER XVIII.

It was on a day some five weeks later that Nick came back from a morning spent in the office of a native lawyer, and with a sigh of relief dropped into a chair on the hotel veranda. The lawyer had proved slow, and plodding, and exact, to a degree that had made the impatient New Englander long to take him by the collar and shake him up; and the day was hot.

Nick threw down his Panama hat, and mopped his forehead, thankful for the fact that though the tropic sun is hot, the shade is cool. And after one week ought to finish up the business. As he sat there looking out on the grove of palms that had become familiar in the past weeks, he felt torn between a desire to take the first boat home, and a longing to claim his vacation now and then of the island and its people.

Gay had urged him to stay as long as he could be spared; and only the day before had come a line from John Maxwell saying not to hurry back. "Take another month, boy, and see all there is to see while you've got the chance. Simon Bartlett is taking excellent care of your family, and I know that good wife of yours really wants you to have a taste of freedom. I wonder, Nick, if freedom is all it's cracked up to be? You can tell me about it when you get back."

Nick wondered, too. Although he had enjoyed almost every minute of the time, he had, all the way along, missed Gay's companionship. The night of each new beauty brought the wish that she were there to share it.

"So soon? Isn't it foolish not to see more now that you're here?"

It was foolish, Nick told himself that he had known it was foolish even when he made his resolve an hour earlier.

"Perhaps," he answered. "But I ought to get back. This is a business trip on my part, you understand."

"But they'd let you stay, wouldn't they? In another month you could learn so much about the island. Or you could run down to Panama—through the canal to Ancon."

"Don't!" begged Nick, as if thrusting aside temptation. Her words had brought up the old magic. It would be wonderful to see those things. Yet

"You could stay longer, couldn't you?"

He came back to earth at the question.

"Why, of course, it's merely a matter of conscience. I feel that I mustn't impose on Mr. Maxwell just because he's good enough to let me stay. And besides, I've a family to consider."

Surely Mrs. Hastings wouldn't begrudge him this wonderful opportunity.

"I should say not! Perhaps that's the worst thing I could get back to her! That sounds incredible, but it's the truth. However, it would do no harm for me to take an extra week. What ought I to see most?"

Angela leaned forward. There was a gleam of victory in her shining eyes. Nick did not see because she had discreetly lowered them. When she looked up it was gone, and only their innocence remained.

"I've had you in mind a lot lately, Nick," she said. "I know you're not likely to take a long trip away, and I want you to make the most of it. You remember my friends the Myers who live at Bakerly?"

They're about to start a new business in their gasoline yacht. They'll go into places the big liners don't touch, and see unusual things. They've asked me to join them, and—bring a friend along. I wonder if you'd care to be that friend?"

To Be Continued.

Woman Has Intricate Job

Supervises Control Of Truck Traffic In Chicago Tunnels

An interesting illustration of woman's place in the modern world is the appointment of Miss Ruth Heffer as the controller of the truck traffic in the tunnels that underlie the loop in the city of Chicago. These are the congested business portions of the city there are 62 miles of trucks through which trucks are directed to the big stores and warehouses for unloading. For the greater part of the tunnels have only a single track, and it is a difficult problem to avoid a great multitude. Miss Heffer, who is barely twenty-two, sits at a switchboard where she controls a central plant in a battery of almost 300 telephone lines connecting with every part of this network of trucks. The trucks do not only go to their proper destinations, but they must be returned over the system of one-way tracks to the particular roadway lines from which they have been received.

In the intricacy of the work she involved resembles a very elaborate game of chess. By means of her scores of telephones Miss Heffer is able to keep in close touch with all that is happening in the narrow, winding tunnels that lie far below the streets and skyscrapers of Chicago.

Miller's Worm Powders not only make the inflexible system untenable for worms, but by their action on the stomach, liver and bowels they correct the appetite, and internal distension and other internal disorders. It is planned to extend the trade through improved methods of storage, branding, packing, publicity and overseas marketing supervision.

Will Push Apple Trade

Plans to extend the trade gained by Ontario apple growers in the British market last year are being made by the provincial department of agriculture. It is planned to extend the trade through improved methods of storage, branding, packing, publicity and overseas marketing supervision.

Editor Wants To Know

Seven men were in a grocery store. One was a reporter. Six of the men told the reporter how to run a newspaper, but no one told the grocer how to run a grocery store. Why is it that nearly everybody knows how to run a newspaper and only a few people know how to run a store?

Burials found at Ur of the Chaldeans show that the custom of shaving the head and wearing a wig was known in that ancient city.

Austria will at once spend \$2,300,000 on new highways.

home for Borden's CHOCOLATE MALTED MILK

WHY MOTHERS choose Borden's Malted Milk for their children is because it is so good for them. It is a perfect food, and it is so easy to digest. It is the best food for children, and it is the best food for mothers.

For a moment I was paralyzed. Mr. Borden's Malted Milk was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

It was the best food for children, and it was the best food for mothers. It was the best food for children, and it was the best food for mothers.

Flexible Wood For Walls

Can Be Applied As Easily As Paper

Planning to redecorate a room? How would you like wood paneling as a change from wallpaper or painted walls? If you would, don't forsake your trusty paper hanger. He can hang the wood.

A new type of wood has been introduced on the market. It is a thin sheet of choice and genuine cabinet wood mounted on fabric, which is as flexible and practical as canvas. In pine, mahogany or walnut, or in special grained grades, the new wood product can be installed over any surface, metal, plaster or tile. Its possibilities are multitudinous. The producers assure us that two coats of this new wood will give it a finish to rival the finest of cabinet woods and add the interesting note of the wood grain. It costs only at one-tenth the cost of the old-fashioned wood work.

And the paper hanger can go hang the wood.

As a vermicide an excellent preparation for Mother Graves' Worm Expeller. It has saved the lives of countless children.

An Unknown Quantity

Greatness Of Canada Is Hardly Grasped By Most Canadians. It will take 15,000 men under General Wolfe to capture what was then Canada in 1759.

It will take 15,000 men and women in 1931 to take the census of what is now the Dominion of Canada.

In 1759, Canada's greatness was an unknown quantity to Canadians. In 1931, Canada's greatness is still an unknown quantity to most Canadians. They do not grasp the enormous wealth they have. They do not know how to get the best markets for the tremendous produce of the land. They do not even know how many people Canada has.

The Dominion census this year will correct that. It will find how many people there are, what they do, what they own, and it will be the first time a regular encyclopedia of Canadian affairs.

Trail Rides-In the Rockies

Trail Rides, both short and over a number of days, may be taken in the Canadian National Parks in the Rockies, where there are experienced packers and guides familiar with all the main routes of travel. These guides can be relied upon to take any party to the outstanding features and points of interest that do not lie on the regular beaten tourist path.

New Industries For Manitoba

The Winnipeg Industrial Development Board reports 12 recent new industries for Manitoba, two of which are branches of foreign organizations. This is regarded as a very encouraging report and shows that the industrial trend towards Manitoba is being maintained.

Children Cry For It—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him settled, asleep again in a jiffy. Nothing is more valuable in diarrhoea. When coated tongues or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Fletcher's CASTORIA

STATESHIP POLICY FOR G.T. BRITAIN

London—Making his long-awaited statement on the future ship policy of Great Britain, Prime Minister Ramsay MacDonald indicated in the House of Commons that the shipbuilding activities would be confined largely to scientific research. The 2,100 will be retained without alterations as a ship for experimental purposes, and the base at Cardington will be kept up on a research basis.

Mooring masts established at St. Hubert airport, near Montreal; at Ismaïlia, Egypt, and Karachi, India, will be retained subject to the assent, so far as the St. Hubert mast was concerned, of the Canadian government. He was sorry, the prime minister added, that the Canadian government had not agreed as yet to inquire into its views on the St. Hubert mast.

"The idea was that with the co-operation of the Canadian government on the same scale as it gave us in the construction of the mast, the mast would be kept up while a new scheme is in operation."

Several speakers urged the Canadian government should be asked to increase the production of helium. F. Montagu, under-secretary of state for the air ministry, replied that in view of the limited program of the R-1100 there was no necessity for increasing the substitution of helium for hydrogen gas. The cost should also be considered. There would be a charge of \$500,000 for a plant on the scale of an annual expenditure of \$100,000. Besides, helium is a greater lift of hydrogen was an important factor. Mr. Montagu's explanation closed the debate.

Cannot Collect Income Tax On Indemnities

Supreme Court of Canada Hands Down Important Ruling

Ottawa—Insurance indemnities are not liable to Dominion income tax. The Supreme Court of Canada has ruled in allowing the appeal in the case of the British Columbia and Columbia Insurance Company against the King. The company insured itself against fire, also against loss from shut-downs of the plant resulting from fire. A disastrous fire occurred and insurance companies paid the company \$50,000. The National Revenue Department claimed the money was income and therefore taxable. This view was supported by the Columbia Court of Appeal. The Supreme Court of Canada, however, decided to the contrary.

Conference On India

Second Round Table Conference To Be Held In November

Shimla, India—The first week of November was tentatively set for the second round table conference at London on an Indian constitutional matter. The federal nature of the committee, which will undertake preliminary work, will meet in London in September.

The conference should be concluded by Christmas, exploring the need for two months provision of self-government and necessary safeguards for the great continental peninsula with its 250,000,000 souls.

There will be 300 or more delegates, including Mahatma Gandhi whose vast constituency—the Indian Nationalists—were not represented in the round table conference recently concluded at London.

Rival Aces Meet

Wing Commander Bishop Shakes Hands With German Flyer

Montreal—Canada's foremost aviator, credited with more aerial victories than any other allied pilot, met today Hugo Koenig, ex-Canadian flying officer of Baron Von Richthofen's Flying Circus recently. Wing Commander William Avery Bishop, V.C., shook hands with the German flyer, and then the two sat down and compared up scenes over the Arras sector in the front away back in 1917. Major Koenig said that Bishop was as highly respected as Richthofen by the Germans at home.

Carry On Thriving Trade

Ottawa, Ont.—When the Islands of St. Pierre and Miquelon were ceded to France after the conquest of Canada by the British, it was little dreamed the time would come when they would rank ninth among the nations of the world in total trade with the Dominion. Consisting almost entirely of liquor, Canada in the last five years sold the two islands a total of \$1,091,479, out-running Australia, Ireland, Argentina, Brazil, China, Mexico, Sweden and Denmark.

W. N. 1, 1930

Riots In Spain

Government Orders Confiscation Of Private Property Of Alfonso

Madrid, Spain.—Following further anti-clerical riots in Spain, in spite of the strict watch of soldiers, the government has decreed the confiscation of the private property of King Alfonso, pending an investigation and commanded provincial governors to order the strictest measures to restore order.

Meanwhile Cardinal Primate Segura, a Catholic archbishop of Toledo whose pastoral letter created a stir over a week ago, had crossed the Spanish border and was on his way through France, presumably on journey to Rome.

Several more churches and Catholic religious houses were burned and sacked in provincial cities, in spite of the fact that martial law had been declared in most of the larger centres.

A nation-wide check-up of police forces, civil guards and provincial governments was ordered by the cabinet. The action resulted from the government's belief that some of these officials had been slack enough in dealing with the situation.

Twenty-nine chiefs of police or their lieutenants and 100 members of civil guards and one secretary of a provincial government were discharged for alleged incompetency.

It was reported also that some provincial governors were to be displaced.

Cardinal Segura, accompanied by his brother, Canon of the Toledo Cathedral, drove in an automobile to the French border at Hendaye, France, and continued from there to Toulouse. It was supposed they were bound for Rome.

For Armament Reduction

Canadian Womanhood and Organized Labor Support League

Ottawa, Ont.—Canadian womanhood and organized labor strongly support the League of Nations and its aims. It was reported at the ninth annual conference of the League of Nations Society in Canada. It was made known that a huge petition will be presented on behalf of the women of the Dominion at next year's meeting of the Naval Disarmament Conference, urging reduction of the manufacture of instruments for warfare.

Tom Moore, president of the Dominion Trade and Labor Congress and its representative on the society's executive, declared before the group that disarmament was needed in all countries on armaments than on social effort.

"It is necessary that we find some means by which money may be devoted to the betterment of the people instead of upon means of destruction," he added.

A number of other speakers reported the organizations which they represent supported the work of the League of Nations. Among these were Mrs. C. Field Robertson, of the Federated Women's Institute embracing 80,000 Canadian women; Mrs. J. A. Wilson, president of the National Council of Women; and Miss Violet Macdonald, secretary for the United Farmers of Ontario.

Interview By Television

Mrs. Philip Snowden Gives Interview Through New Medium

London, England.—While Rt. Hon. Philip Snowden, Chancellor of the Exchequer, was confined to bed for a few days under doctor's orders, the Daily Herald quoted Mrs. Snowden in what it described as "the first interview by television in history."

Both the interviewer and Mrs. Snowden were visible as well as audible to each other, one in the Herald's office and the other at 31 Downing Street. Asked about the chancellor's health, Mrs. Snowden told the reporter: "He has had a setback this week. I'm afraid. But I do not think it is serious. However, it has temporarily deprived him of the use of his legs to some extent."

Mrs. Snowden virtually rose from a sick bed a short time ago to place the jacket before the House of Commons. His physicians today told him to return to bed.

King Of Siam Better

Purchase, N.Y.—King Prajadolok of Siam was reported by Dr. John M. Whelan as showing further signs of improvement following removal of a catarrh from his left eye Sunday. He is now able to see and is expected to be able to see again.

Many Given Employment

Ottawa, Ont.—Latest figures in connection with the Dominion Government unemployment relief scheme show that 272,000 persons were given employment in Canada up to April 30 under the joint federal-provincial municipal program of public works.

Detect Nationalistic Spirit

British Trade Mission Finds Deeds In Canada To Foster Domestic Trade

London, England.—Members of the Trade Mission which visited Canada and the United States in the interests of the Scottish woolen industry, a newspaperman that they had been struck by the "intensely nationalistic feeling" in Canada.

In Canada there was a desire to foster Canadian secondary industries at all costs, coupled with a desire to buy at home, the manufacturers said. This feeling did not exist in the United States, they said. It was essential that Scottish manufacturers should have better publicity and a better selling organization in both countries the members of the mission stated.

IS OPPOSED TO ANY CHANGE IN BANKING SYSTEM

Ottawa, Ont.—The banking system of Canada is adequate to the needs of this country and no reason exists for a change. This was the opinion expressed in the House of Commons by Rt. Hon. R. B. Bennett, prime minister, and acting minister of finance.

Mr. Bennett asserted that the Canadian system embraced those great basic requirements which are essential to its success. It provided the people with a safe deposit for the money which they desired to save, and it furnished to those people requiring money adequate facilities for borrowing.

Mr. Bennett emphasized that complicated discussion which some times took place in respect to banks and their place in the community, must always resolve itself into a simple, single inquiry. "Has the bank, through its management, had regard in lending money to the fact that it may be called upon to repay that money to the source from which it was borrowed?"

"It may well be," Mr. Bennett declared, "that the time will come in this country when it is deemed desirable to expand our system as it now exists. I am not saying it will be, but one of those who believe that you cannot today with respect to financial operations say with certainty what it may be desirable to do tomorrow—using the word tomorrow, not in its literal sense, but in relation to the way we employ the term in financial operations."

"Discussion arose on a motion of G. Coote, U.E.A. member for Macleod, Alta., asking the House to declare that 'there should be established in Canada a nationally-owned bank.' At some length Mr. Coote advocated the establishment of such a bank, declaring that it could take many of the duties now discharged by the department of finance, administration of the Finance Act, probably by the issuance of Dominion notes and supervision of the Post Office Savings Bank. He expressed the belief that intelligent and effective control of credit in Canada could best be obtained through some such central institution.

TO SEEK BURIED TREASURE

Frederick L. Blair, of Boston, who heads an expedition this summer to seek buried treasure upon Oak Island, off Nova Scotia. Mr. Blair has spent 30 years already in an effort to find the treasure.

Frederick L. Blair, of Boston, who heads an expedition this summer to seek buried treasure upon Oak Island, off Nova Scotia. Mr. Blair has spent 30 years already in an effort to find the treasure.

Made In West Campaign

Develop Markets For Goods Manufactured In Western Canada

Winnipeg, Man.—Western Canadian manufacturers gathered in conference here and decided to commence a campaign to sell "Made-in-the-West" goods to the public. The plan was formulated to develop markets for articles manufactured in the West.

A distinctive identification mark or label placed on all goods was favored by the conference. The mark would show that the articles were produced by prairie labor. Manufacturers and retailers will co-operate closely in furthering the "Made-in-the-West" campaign.

Government Figures Based On Farmers' Plans May 1

Ottawa, Ont.—The estimated acreage of spring wheat in all Canada for this season is 22,132,200, as compared with 24,082,500 last year. This estimate was announced by the Dominion Minister of Agriculture in a report issued May 12. This means that 1,930,000 acres less will be under wheat during 1931 than was the case in 1930.

In Alberta the acreage is 89 per cent. of last year; in Saskatchewan, 82 per cent.; in Manitoba, 98 per cent.; in Ontario, 99 per cent.; Quebec, 100 per cent.; New Brunswick, 95 per cent.; in Nova Scotia, 98 per cent.; British Columbia, 102 per cent.; Prince Edward Island, 101 per cent. The acreage for all Canada for spring wheat is 92 per cent. as compared with 100 last year, a decrease of eight per cent.

The report explains that the figures are to be regarded only as an indication of the seedling plans of farmers on May 1. The actual acreage sown may be changed by later conditions, particularly by soil and weather conditions and by price movement.

Education In Penitentiaries

Ottawa, Ont.—Greater opportunity for educational expansion should be given inmates of Canada's penitentiaries, believes Miss Agnes MacPhail, one woman member of the House of Commons, who addressed an Ottawa service club. The increase in penitentiary inmates was attributed by Miss MacPhail to the prevalent depression and unfavorable home conditions.

Has Letter For Premier

Tokyo, Japan.—Sgt. Yoshinari, Japanese aviator, who is attempting a flight from Japan to the United States via the Arctic route, has written a letter to the United States on his solo effort across the north Pacific a sealed letter from Hon. Herbert Markier, Canadian minister in Tokyo, to the prime minister of Canada, Rt. Hon. R. B. Bennett.

NOVEL DISPLAY ON WESTERN TOUR

It was obvious he said, the economic committee of the Imperial Conference had grave misgivings as to the effect of a quota on prices. Far from furthering imperial unity it would become a discordant imperial factor and also invite retaliation by other countries like the Argentine.

Lord Armour made passing reference to Rt. Hon. R. B. Bennett's offer to the Imperial Conference and the fact that he had not been able to attend, which he said, "would shock this country."

Rt. Rev. Bertram Pollock, Bishop of Norwich, challenging Lord Armour's assertions from beginning to end, said if any kind of Empire preference was found to be good, then some further step could be taken. "We are not necessarily committed to a long series of further steps," he declared.

Lord Armour has failed to follow the reasoning that a quota means a duty on foodstuffs or raw materials. That was never part of the government's policy and the various Dominion governments had made it clear they did not desire it. It was not a question of price, but of quantities, and he was unable to see why a quota should prove impracticable.

On the other hand, it was useless for the farmers to have a quota without a guarantee price, which would mean raising the price of wheat from 75 cents a bushel to 85 cents a bushel. The real treatment for the farming industry in the Old Country was an adaptation to new economic conditions, he declared.

In its specially outfitted Canadian National Railways express car now touring the Dominion, Canadian General Steel Works are giving actual demonstrations of coal, wood, electric, coal oil and gasoline heaters. While the car will, whenever possible, travel on passenger runs, hunks have been installed for the use of attendants when the car is being loaded by freight.

Senator Urges Joint Holiday

Would Have Remembrance Day and Thanksgiving Celebrated Together

Ottawa, Ont.—Joint celebration of Remembrance Day and Thanksgiving would be the aim of a motion which will be introduced in the Senate by Hon. John Stanfield. When the Senate was considering a bill which passed the House of Commons during the Remembrance Day on November 11, Senator Stanfield gave notice of his motion. The subject of the motion was referred to a committee, where the proposed change will be considered.

The bill, as it passed the lower House, changed the name of Armistice Day to Remembrance Day and fixed it permanently on November 11. At the present time, it is celebrated on the Monday of the week in which November 11 falls.

Made In West Campaign

Develop Markets For Goods Manufactured In Western Canada

Winnipeg, Man.—Western Canadian manufacturers gathered in conference here and decided to commence a campaign to sell "Made-in-the-West" goods to the public. The plan was formulated to develop markets for articles manufactured in the West.

A distinctive identification mark or label placed on all goods was favored by the conference. The mark would show that the articles were produced by prairie labor. Manufacturers and retailers will co-operate closely in furthering the "Made-in-the-West" campaign.

APPROVAL IS GIVEN TO EMPIRE WHEAT QUOTAS

London, England.—The Labor Government has approved the general principle of a quota for Empire wheat. This was the statement of Lord Parmoor, president of the council in the Labor cabinet, in the House of Lords. The quota would assure wheat-growing Dominions a certain proportion of the British market.

Lord Parmoor believes the project is quite feasible. "The difficulty is one of detail which cannot be disposed of until after the forthcoming conference at Ottawa. The Dominions do not think it is impossible and neither does the United Kingdom. Whether the dominions can formulate a scheme which will be satisfactory, only time will tell," he declared.

Lord Parmoor did not believe a quota on wheat grown in Britain could be of any benefit to the Empire. "The quota would be used without adding to the burden of the taxpayers."

The decision of the government was not unanimously endorsed by the Lords. The Labor peer, Lord Armour, made a slashing attack on the proposal. "It is a crude and terrible proposal," he stated. "A quota of 55 per cent. of the Dominion's wheat would not only be practicable, but it would increase the recent British export of Dominion wheat, but would only represent one-fifth of the total Canadian-Australian surplus, in the current year of 512,000,000 bushels."

It was obvious he said, the economic committee of the Imperial Conference had grave misgivings as to the effect of a quota on prices. Far from furthering imperial unity it would become a discordant imperial factor and also invite retaliation by other countries like the Argentine.

Lord Armour made passing reference to Rt. Hon. R. B. Bennett's offer to the Imperial Conference and the fact that he had not been able to attend, which he said, "would shock this country."

Rt. Rev. Bertram Pollock, Bishop of Norwich, challenging Lord Armour's assertions from beginning to end, said if any kind of Empire preference was found to be good, then some further step could be taken. "We are not necessarily committed to a long series of further steps," he declared.

Lord Armour has failed to follow the reasoning that a quota means a duty on foodstuffs or raw materials. That was never part of the government's policy and the various Dominion governments had made it clear they did not desire it. It was not a question of price, but of quantities, and he was unable to see why a quota should prove impracticable.

EFFORTS MADE TO PROMOTE SALE OF WHEAT

Ottawa.—Every possible effort is being made by the government to find markets for Canadian wheat and to disabuse any antagonistic attitude of Europe might have against grain from this country. Hon. J. H. Stevens, minister of trade and commerce, declared in the House of Commons.

When estimates for his department were before the House, Mr. Stevens was pressed by opposition members to rectify the steps taken by the government to find markets for wheat. In response to that invitation, Mr. Stevens said the government, upon assuming office last August, had no time in instructing Canada's trade commissioners to bend every effort in broadening markets for wheat and flour.

In 1929 and 1930, Mr. Stevens proceeded, at individual arore in Europe that was against wheat from North America. In 1931, however, Canada was charged with advancing prices. Europe then turned to other markets. Mr. Stevens said that, in addition, many flour millers in Germany, France, Sweden and some other countries changed their agents, so as to buy Argentine wheat, not Canadian. This year the millers were found to be reluctant to change back their agents, and the government had had applied "very drastic protection for their own agriculturists and for their own commerce."

Mr. Stevens said that the government had fixed a quota against foreign wheat and strenuous propaganda was carried on to give place to local wheat.

"Recognizing these conditions and to disabuse the minds of European millers," continued Mr. Stevens, "we have tried to build up markets in other parts of the world. But that will take time, it will take years. We have made some progress. We also have made markets in Columbia, small, I admit."

Later on, Mr. Stevens said, the government had changed its policy. That had been followed by a better feeling toward wheat, and it was now taking years. We have made some progress. We also have made markets in Columbia, small, I admit."

Later on, Mr. Stevens said, the government had changed its policy. That had been followed by a better feeling toward wheat, and it was now taking years. We have made some progress. We also have made markets in Columbia, small, I admit."

CHAMPION CHATTER

Vol. 4

Thursday, May 21, 1931

No. 32

Published in the interest of the People of **Champion and Farmers of the vicinity.**
GEO. L. DEPUIS, Editor.

It's strange how fast mail trucks drive when they pass you on the street, and how long it takes a check to reach you.

It is mighty tough to have to lie in bed and particularly at this season of the year. Mrs. McIntyre has our sincere sympathy.

Most of the time it is quite a relief to get back to where you were so glad to get away from.

Mc-Dr. tractor disk harrows are constructed especially for tractor use in rough and rocky fields where conditions are extraordinarily severe. They will stand up to the hardest work without strain or breakage. The tractor disk gangs at the desired angle. The operator needs merely to raise

the draft lock, the handle of which he can reach from the tractor. Pulling ahead causes the gangs to take their angle. Straightening the gangs is accomplished by backing the tractor and returning the draft lock to its original location. The rear disks cannot trail the front disks, owing to the rigidity of the connection between the two sets of disks with respect to side motion.

Grape juice would sell as well as ginger ale if it could get up enough ambition to greet you when you open the bottle.

The discs in the Mc-Dr. cream separator are made of heavy steel and spaced by metal bolts electrically welded to each disc in the complete disc is then tinned. Tinning the discs after the bolts have been welded makes a one-piece, sanitary disc that will not collect dirt and

rust as do the common type of calk discs. She: "Isn't he connected with you by marriage in some way?" He: "Yes, he married my fiancée."

We get a lot of honest satisfaction out of the knowledge that we have "pleased another customer."

The crazy names they paint over the doors of summer cottages won't keep the mosquitoes away, nothing will.

The rubber ring in the Mc-Dr. cream separator seals the bowl perfectly and is seated on a smooth shoulder around the horizontal plane of the bowl. The rubber ring is easily removed for washing after each skimming, which prevents rust and an unsanitary condition.

"Good Equipment Makes a Good Farmer Better."

Local and General

Mrs. G. F. Smith left for Calgary this week.

G. L. Dupuis was a visitor to Lethbridge on Wednesday.

Mr. and Mrs. T. Sletto spent the week end in Calgary.

F. F. Fox and family leave for New Hampshire in a few days.

Miss Agnes Patterson is in Lethbridge, reviewing Grade XII work.

The Trail Rangers will meet in the church on Friday evening at 7.30.

Alberta Conference meets on Tuesday May 25th and ends June 1st, at Calgary.

Miss Rheta Campbell spent the week end with her parents taking in the big dance.

All nature will soon be smiling in the vicinity of J. M. Moffatt's irrigation system.

The Ladies Aid will meet on Thursday, May 28th, at the home of Mrs. J. N. Baubier.

Dr. Freeze is reported to be making satisfactory progress in Calgary, and is expected home soon.

A final notice in connection with the spring clean up appears in this issue. Those interested should carefully peruse it.

Among the visitors in Champion recently, was W. S. Ryan of Warner, former manager of the Canadian Bank of Commerce here.

Mrs. W. A. McIntyre is reported as making very satisfactory progress towards complete recovery in the Galt hospital, Lethbridge.

Mr. and Mrs. W. Jensen returned from a trip to Edmonton on Tuesday. Gordon McLean was in charge of the elevator during his absence.

Mrs. J. N. Baubier, Mrs. F. C. Alook and Mrs. D. W. Watkins left for Edmonton on Saturday, where they will attend the W.I. convention, taking place this week.

Miss Barbara Dow returned from the hospital at Calgary on Friday last, and the family are receiving congratulations on the recovery of both mother and daughter.

K. R. McLean, R.O. of McLean & Anderson, Sight Specialist 224-5th Ave West, Calgary will make his monthly visit to Champion Friday May 20th, at the Drug Store.

Blow ye winds of the morning
Then blow ye winds, heighten
Blow away the morning dew—
Blow—Blow—Blow.

Ruth Jopling spent the week with her uncle and aunt Mr. and Mrs. Sam Jopling in Calgary.

Rev. R. G. Wood of Killam will be the special speaker at Champion United church May 31st.

Mr. and Mrs. Geo. Taylor and family and Mrs. Jack Taylor spent the week end in Calgary.

Wind storms over the week end damaged summerfallow crops, seriously in some instances, in many parts of the province. The absence of moisture will aggravate the damage considerably, and it is to be hoped early rains will arrive to offset the injury to crops from drifting.

Those new dresses at Campbell's are the talk of the town.

According to a report issued by the Searle Grain Co. all wheat and 50 per cent of coarse grains was sown by May 18th. Indicated acreage of wheat was 21,897,000 against 23,000,000 last year. Moisture conditions were unsatisfactory in all three provinces.

Cabbage, Cauliflower and Tomato plants now ready at Campbell's.

Entirely New Version Of the 23rd Psalm

Bennett is my shepherd; I am in want.
He maketh me to lie down in railway depots;
He leadeth me beside the silent factories.

If the crazy names they paint over the doors of the Liberal party!
He leadeth me in the paths of desolation for his party's sake!

Lo, I fear great evil; for thou art against me.
Thy politicians and thy profiteers they frighten me.

Thou preparest a reduction in my wages before me in the presence of mine enemies.

Thou annointest my income with taxes.
My expense runneth over;
Surely unemployment and poverty will follow me all the days of the Conservative administration;

And I will dwell in a lowly rented house for another four years.—Anon.

Campbell's have a few bushels left of Improved Squaw Corn. Act quick.
